One Cold and Another

The season's first cold may be slight—may yield to early treatment, but the next cold will hang on longer; it will be more troublesome, too. Unnecessary to take chances on that second one. Scott's Emulsion is a preventive as well as a cure. Take

SCOTT'S EMULSION

when colds abound and you'll have no cold. Take it when the cold is contracted and it checks inflammation, heals the membranes of the throat and lungs and drives the cold out.

The public school closed here Friday after another successful school year. Rev. Hatcher of Carrollton delivered the baccalaureate sermon at the opera-house Sunday. We heard some of our local fisher-men discussing the other day about the best time to go fishing. Some said in the morning, some in the evening and some at night. THE P. & O. CANTON Jewel Hammock Cultivator

The most popular hammock seat cultivator on the market. It has all the points which entitle it to first place among modern cultivators. The balance lever adjusts the poise of the frame to suit the weight of the operator. The crank shaft, operated by balance lever, adjusts both sides alike, relieving the axles from any twisting strain. The seat is adjustable, suspended from malleable supports, making it impossible to swing loose. The gangs are lifted and controlled by a pendulum and rock arm device, as nearly self-raising as practical to make them, and are responsive to the lightest touch. The depth can be varied by slight foot pressure, as the gangs are given an elastic perpendicular range of movement by means of cushion springs. One of the attractive features is the depth regulating device on the rock arms, which gives added adjustment to that allowed by the cushion springs. Adjustable steel evener, telescope axle, 44 inch staggered wheels, fitted with dust-proof boxes and screw-caps. Can be converted into a surface cultivator by attaching the Jewel Surface Attachment, a change which can be accomplished without drilling holes.
